REASONS FOR ALLOWANCE

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 12, 2007 has been entered.
2. Claims 1-4, 6-9, and 14-16 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James H. Walters, Reg. No. 35, 731 on June 21, 2007.

The application has been amended as follows:

In Claim 9, line 1, delete "An information" and insert -- A computer readable--.

4. The following is an examiner's statement of reasons for allowance:

The closest prior art, Morawiec (U.S. 6,010,405) discloses a videogame system having an audiovisual presentation designed to simulate an episodic nature of a comic book page. The audiovisual presentation is defined by distinct panels sequentially arranged to form a page

layout, the panel limits the player-controlled character play to in an active panel in which the character must complete tasks before proceeding forward in the sequential arrangement of panels to create the comic book story. Additionally, the videogame system allows a player variety by providing alternate routes in which to traverse the panels thereby enabling a game player to determine the story line. Graphic effects are also provided to enhance the comic book medium simulation. However, Morawiec lacks disclosing, teaching, or fairly suggesting at least when a player character moves along a course plural times, the viewpoints in the first time movement and the second time movement are made different as similarly described in independent claims 1, 8, and 9. Conversely, Morawiec discloses the viewpoints in the first time movement and the second time movement are the same whether traveling in a forward or backwards direction. Thus, the present invention includes a computer readable medium and program on a game apparatus that sets a plurality of viewpoints in the view in which the character is included and a program to prepare two-dimensional images corresponding to a plurality of the viewpoints. This allows the present invention to change the backgrounds included in the field of view of corresponding to each viewpoint even if the play character traces the same course, making it possible to reduce the number of game spaces that must be created.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
